DETAILED ACTION

1. Claims 1-5,7-8,17,18,25-33 are presented for examination including new additional claims.31-33

2. Newly submitted claims 31-33 are directed to inventions that is independent or distinct from the invention originally claimed for the following reason:

Claims 31-33 are directed toward a silicon nitride memory device classified in class 257 subclass 324 (species I).

The above inventions are distinct from the invention of the original claims 1-5, 7-8, 17-18, 25-30 that are directed to a semiconductor memory device with buried bit line classified in class 257 subclass 390 (Species II).

Since the applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 31-33 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1. 142(b) and MPEP 821.03.

Examiner's Amendment.

3. An examiner's amendment to the record appears below. Should the changes and/or

Art Unit: 2818

additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee:

A/ Claims 31-33 are cancelled since they are directed to non-elected inventions (see paragraph 2 in the Office Action)

B/ Change the title to:

-- Structure of a memory device with buried bit line --

Reason for allowance

4. Claims 1-5, 7-8,17,18, 25-30 are allowed. The following is an examiner's statement of reason for allowance: None of the references of record teaches or suggests the claimed structure of a memory with buried bit line having:

--" A buried bit line formed in a substrate of a semiconductor de-vice, comprising a shallow doped region, disposed in the substrate; and a deep doped regions, disposed in the substrate under a part of the shallow doped region, a deep doped region, disposed in the substrate under a part of the shallow doped region, wherein dopant concentrations in the deep doped region and the shallow doped region are about the same, and the shallow doped region and the deep doped region together serve as a buried bit line of the memory device. " --

in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
